Objective

- Our objective is to provide a dynamic and immersive gaming experience through our web app. We aim to entertain and engage users of 8-16 age groups by offering a diverse collection of high-quality games across various genres.
- Our web app strives to create a vibrant gaming which will not only entertain the user it will also boost and enhances the memorizing power by brainstorming games and puzzles
- Our webapp comeup with a user-friendly interface, seamless mobile compatibility, our goal is to deliver enjoyable and accessible gaming experiences that captivate and delight users, ultimately becoming their go-to destination for entertainment and fun.

Objective

- We recognize the importance of a user-friendly interface that enhances the overall gaming journey. Our objective is to provide a seamless and intuitive user experience, ensuring easy navigation, quick access to games, and smooth interactions within the app. We want our users to effortlessly discover new games, dive into thrilling virtual worlds, and get lost in the magic of gaming
- Ensuring mobile compatibility is essential to us. We understand that gaming is not limited to a single device, so our web app is designed to be responsive and adaptable across various platforms and screen sizes. Whether you prefer gaming on a desktop, laptop, tablet, or smartphone, we want to ensure that you can enjoy the excitement of our games anytime, anywhere.

Details about component

- Home Page: The Home Page will basically shows the vibrant and interesting games With small description of our Web-App.
- Game Library: The game library is the heart of the web app, containing a vast collection of games. It includes games from different genres such as puzzle, strategy, and more. The library will have categorization and search functionalities, making it easy for users to discover and access their preferred games.
- Favourites: It will contain the top played games on our website. So it will make easy for our web app users to search games which are more popular among people.

Details about component

- **Mobile Compatibility:** With the rise of mobile gaming, it's crucial for a web app consisting of games to have mobile compatibility. The app should be responsive, adapting to various screen sizes and orientations to ensure a seamless gaming experience across desktops, laptops, tablets, and smartphones.
- **Customer Support and Feedback:** Providing a dedicated customer support system allows users to report issues, seek assistance, or provide feedback directly within the web app. Timely and responsive customer support enhances user satisfaction and helps address any concerns or technical difficulties.
